

Exact elementary transform: literal roots to reciprocal suspension

$$H_{rec}(U, V) = \frac{1}{U^4} \frac{V}{U - V} H_{ES}(pV, U)$$

$$= V \prod_{i=1}^3 (U - (p/x_i)V)$$

EZ28C: exact identity, including sign and scale

Information retained / lost

$$e_2 = 125u_4^2(u_3 - 5u_0u_4)/u_3^4$$

$$e_3 = 625u_0u_4^3/u_3^4$$

$$\text{fibre: } (p, x_i) \mapsto (\lambda p, \lambda x_i)$$

projective signs: $8 \leftrightarrow 8$; affine chart: $8 \rightarrow 7$

Schematic of the proved projective root operation; horizontal spacing is not a metric.
