

Exact joint-observation and collision geometry

Joint ES refinement of one RH grid, $k = 5$, $D = 0$

Red cells: $\text{Var}(j | u, v) > 0$. $\dim \mathcal{M}^{\text{joint}} = \binom{8}{3} = 56$, $q = 36$, $\text{rank } L_E = 16$, $\dim \ker L_E = 20$.

Two-centre collision spectrum, $(e, f) = (3, 2)$
